(305) 903-7061

United American Standard Products, LLC ("UAS") was founded in 2013, when a simple idea from a friend sparked the creation of a door distribution business. Within just two years, UAS was already selling over 70,000 doors annually, marking an impressive start in the industry.

As the market evolved, UAS adapted by transitioning to higher value-added products and shifting focus to a different customer base. This strategic move allowed us to better meet the changing demands of the market, positioning UAS as a leader in delivering high-quality, innovative solutions to our clients.

Cost Savings & Expanded Reach

With our direct access to global manufacturers of various products, UAS can help you reduce your purchasing costs from 20% to over 60%! We currently operate warehouses in Miami and Orlando, Florida, to enhance sales and delivery flexibility. We are in the process of developing at least two more locations in Texas and Georgia in 2025. This expansion ensures faster, more efficient service to meet the growing needs of our customers.
